

## Automotive Skills Development Council

#### QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR AUTOMOTIVE INDUSTRY

#### What are Occupational Standards(OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

#### Introduction

#### **Qualifications Pack- QC Inspector Level 4**

**SECTOR: AUTOMOTIVE** 

**SUB-SECTOR:**MANUFACTURING SUPPORT

**OCCUPATION: QUALITY ASSURANCE** 

**JOB ROLE:** QC INSPECTOR LEVEL 4

**REFERENCE ID:** ASC/Q6303

**ALIGNED TO: NCO-2004/Nil** 

**Brief Job Description:** Individuals at this job need to be responsible for the quality control of the manufactured products in order to deliver high quality to customers

**Personal Attributes:** This job requires the individual to be able to coordinate internally and externally within the organization. The individual should be result oriented, and possess strong quality management skills. The individual should also be able to demonstrate skills for mathematical reasoning, problem solving, relationship building and leadership

Qualifications Pack Code	ASC/Q 6303		
Job Role	QC Inspector- L4		
Credits(NSQF) [OPTIONAL]	TBD	Version number	1.1
Sector	Automotive	Drafted on	13/08/13
Sub-sector	Manufacturing Support	Last reviewed on	27/08/13
Occupation	Quality Assurance	Next review date	30/07/15

Job Role	QC Inspector- L4
Role Description	inspecting the manufactured products as per the quality standards and implementation of corrective actions
NSQF level	4
Minimum Educational Qualifications*	ITI in Mechanical/Electrical/Electronics Engineering ( Product
	content based)
Maximum Educational Qualifications*	Not Applicable
Training (Suggested but not mandatory)	<ul> <li>Compulsory:APQP/CP, pre-delivery inspection techniques, handling Basic inspection equipment, Introduction to MSA / SPC, PFMEA etc.</li> <li>Voluntary:7 QC tools, , problem solving techniques, Decision making hierarchy in organization</li> </ul>
Experience	<ul> <li>minimum 2-4years in Quality/ Manufacturing department or ASDC QC Inspector Level 3 certificate</li> </ul>
Applicable National Occupational Standards (NOS)	Compulsory: ASC/N6303. Inspect and maintain the product quality  ASC/N0006Maintaining a safe, clean&secureworking environment ASC/N0021Maintaining 5S in the work premises Optional: N.A.
Performance Criteria	As described in the relevant OS units

Keywords /Terms	Description
Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or an area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
Sub-function	Sub-functions are sub-activities essential to fulfill the achieving the objectives of the function.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria	Performance criteria are statements that together specify the standard of performance required when carrying out a task.
National Occupational	NOS are occupational standards which apply uniquely in the Indian
Standards (OS)	context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding	Knowledge and understanding are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish

	specific designated responsibilities.
Core Skills/ Generic Skills	Core skills or generic skills are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Keywords /Terms	Description
NOS	National Occupational Standard(s)
NVQF	National Vocational Qualifications Framework
NSQF	National Skills Qualifications Framework
NVEQF	National Vocational Education Qualifications Framework
QP	Qualifications Pack
SAP- ERP	System Application and Products- Enterprise Resource Management software
PPC	Production Planning and Control
HSE	Health , Safety and Environment
PPAP	Production Part Approval Process
PO	Purchase Order
TS	TS 16949 system
APQP	Advanced Product Quality Planning
RCA	Root Cause Analysis
QMS	Quality Management System
MSA	Measurement System Analysis
PFMEA	Process failure Mode & Effects analysis
TOPS	Team Oriented Problem Solving

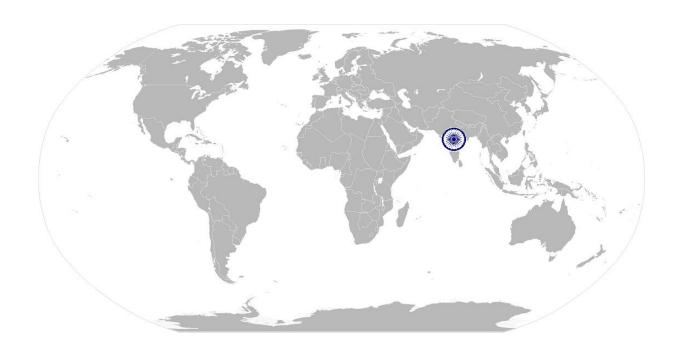

ASC/N6303. Inspect and maintain the product quality

\_\_\_\_\_

# National Occupational Standards

#### **Overview**

This unit is about inspection and maintenance of the quality standards forthe products at various stages of Product Life

#### ASC/N6303. Inspect and maintain the product quality

Unit Code	ASC/N6303	
Unit Title	Inspect and maintain the product quality	
(Task)		
Description	This OS unit is about the individualmonitoringand maintaining the quality of the products	
Scope	The unit/ task covers the following for Receipt, In Process , Final Inspection:	
	pre- delivery inspection of the product	
	pre-PPAP audit of the pilot batch	
	coordinate with R&D QA for FMEA /CP , failures, CAPA & CI issues	
Performance Criteria(P	C) w.r.t. the Scope	
Element	Performance Criteria	
Inspection of final	To be competent, the user/individual on the job must be able to :	
product	PC1. maintain and preserve following samples for monitoring product quality	
	master sample for PPAP	
	inspected batch samples	
	reference samples for the defect library	
	PC2. conduct the process of Inspection at the stages :	
	complete dimensional /Layout Inspection at development stage & later as per the periodicity such as annual for re- validation	
	<ul> <li>in the Production phase as per the CP/ Quality plan/ sampling Plan/ Stage inspection plans/ First off IR</li> </ul>	
	PC3. have an acceptable level of R & R for handling inspection equipment and instruments such as	
	vernier, micrometers	
	<ul> <li>height Gauge &amp; surface plate, slip gauges</li> </ul>	
	acceptance/ Combination Gauges	
	• gauges – Bore, Air , Profile , Dial	
	<ul> <li>instruments/equipments such as surface roughness tester, roundness etc.</li> </ul>	
	<ul> <li>co-ordinate measurement machine (CMM)</li> </ul>	
	PC4. have an elementary understanding of Calibration system for the measuring	
	instruments and ensure getting the equipment/ gauges etc calibrated with	
	the support of QA Standards Room or external agency PC5. conduct an inspection of the product covering the following checkpoints:	
	visual Inspection of the part for scratches, dents , damages, packing	
	<ul><li>as per the norms etc.</li><li>specialinspection using precision measuring equipment, performance</li></ul>	
	trials etc.	
	identification sticker/number/label placed on the product	

ASC/N6303. Inspect a	nd maintain the product quality
	<ul> <li>functioning of the product and its components</li> </ul>
	<ul> <li>review material inspection report from the lab to verify acceptance</li> </ul>
	<ul> <li>documentation pertaining to the Quality</li> </ul>
	PC6. coordinate with the respective process owners and implement CAPA for
	discrepancies in the parameters identified in the IR on immediate basis
	PC7. review the effectiveness of implementation and repeat the process till the
	discrepancies are resolved
	PC8. document the observations of the Inspection and maintain records such as
	IR, ERP-System record and special process capability index calculation/
	charting as per the SOP
	PC9. raise a scrap note and dispose off the scrapped product in the scrap yard as
	per the defined procedure maintaining the HSE complianceas is the case i.e.
	New product/process development / Production phase , the reports and Part
	Submission Warrant, PPAP are to be prepared
	based on the implementation of information flow system in organization like ERP/SAP
	, upload the reports
Pre PPAP Audit (as a	To be competent , the user/individual on the job must be able to conduct a
team member )	readiness audit of the production line as a team member by participating in the
	verification of
	PC10. First Off Inspection Report, CP for coverage of parameters
	PC11. stage Inspection & Process capability Charts
	PC12. availability of validated gauges,
	PC13. R & R
	PC14. training of Production Technicians to the CP
	PC15. documentation formats
Coordination with	To be competent, the user/individual on the job must be able to:
R&D / Quality	PC16. work as a CFT member of the team formed for PFMEA,CP & solving a
Manager CP,FMEA	problem pertaining to the products handled .collect data regarding the
CAPA, CI	problem as decided in the
	PC17. team discussions participate for preparation of Fault tree , conducting
	simulation and implementation of actions
	PC18. participate for updating relevant documentation
	PC19. assist the NPD department in efficient development of the new product by
	PC20. sharing all the problems related to QCD observed in the existing products
	PC21. identify opportunities for improvements in process based on trends or
	PC22. observations in PC -charts, tool Life , poka yoke, reduction in non value added
	(NVA) activities & put these up for consideration to senior management
Knowledge and Unders	tanding (K)
A. Organizational	The user/individual on the job needs to know and understand:
Context	KA1. product portfolio of organization
(Knowledge of the	KA2. the manufacturing processes of organization
	KA3. material classification criteria followed by organization
company /	KA4. policies and procedures for storage and preservation of materials
organization and	KA5. policies , compliances and systems followed for HSE
	KA6. TS-16949/any other QMS system guidelines followed in the organization

its processes)	KA7. New Process/Product development protocol and methodology
B. Technical	The individual on the job needs to have elementary knowledge of the following so as
Knowledge	to interpret the Quality Requirements :
	KB1. manufacturing process being followed for each product
	KB2. inspectioncheckpoints for NPD, Production, Dock Audit etc.
	KB3. APQP, PFMEA, CP KB4. Problem solving & analysis tools like 8Ds, five why analysis etc.
	KB5. RCA analysis techniques
	KB6. requirements for PPAP
	KB7. requirements for TS-16949/QMS system followed
	KB8. NC report format
	KB9. testing equipments operational knowledge
	KB10. information systems like SAP, ERP etc.
Skills (S) [Optional]	
A. Core Skills/	Reading and Writing skills
Generic Skills	The user/ individual on the job needs to know and understand how to:
	SA1. document the PDI observations in the inspection format using precise terms
	for description of the defects , phenomenon etc.
	SA2. understand the contents mentioned on the identification sticker
	SA3. prepare reports/excel sheet/MIS for review of quality manager and senior
	management Communication skills
	Communication skills
	The user/ individual on the job needs to know and understand how to communicate
	with:
	SA4. the concerned departments for failures/any issues SA5. NPD department for new product development
	SA6. concerned departments for dock audit and resolution of the discrepancies
	observed
	SA7. senior management for updating the progress and seeking their support
	SA8. team members for reviewing the progress of day to day activities
	Teamwork and multitasking
	The user/ individual on the job needs to know and understand how to:
	SA9. work as an effective team members ensuring smooth execution of the
	inspection of the product in an efficient and timely manner
	SA10. coordinate with various departments like NPDCFT, Marketing, R&D etc. based
	on the requirement
	SA11. share operation knowledge with colleagues
B. Professional Skill	
B. Professional Skill	The user/ individual on the job needs to know and understand how to:
B. Professional Skill	S Critical thinking

SB2. understand and analyze the inspection report for providing inputs to NPD

#### ASC/N6303. Inspect and maintain the product quality

department for nev	v product	develonment
department for nev	v product	. development

- SB3. interpret the customer (Internal / external) feedback and translate it into the development of the new product in coordination with NPD department
- SB4. identify problems (technical and non-technical), disruptions and delays
- SB5. develop understanding of the process used in the manufacturing of the product & downstream application to graduate to the next /supervisory role

#### **Problem Solving**

The user/individual on the job needs to know and understand how to:

- SB6. think through and devise the countermeasure for resolution for any quality related issue observed
- SB7. work on actions to be taken on immediate basis in case of frequent rejections
- SB8. devise and implement interim/permanent countermeasures for the non-conformities observed in the field failures/warranty issues using analysis tools viz. TOPS, 8Ds etc.

#### **Reflective thinking**

The user/individual on the job needs to know how to:

SB9. analyze the interim countermeasures taken for the resolution of nonconformities observed in the productinspection and dock auditto accordingly devise the permanent countermeasures for prevention from re-occurrence

#### ASC/N6303. Inspect and maintain the product quality

# National Occupational Standard

\_\_\_\_\_

#### **Overview**

This unit is about the understanding all principles of 5S and follow the given guidelines to ensure a clean and efficient working environment in the organization

Unit Code	ASC/N0021		
Unit Title			
(Task)	Maintaining 5S activities in the work premises		
Description	This NOS is about ensuring all 5 S activities both at the shop floor and the		
	office area to facilitate increase in work productivity		
Scope	The individual needs to		
	<ul> <li>Ensure sorting, streamlining &amp; organizing, storage and</li> </ul>		
	documentation, cleaning, standardization and sustenanceacross		
	the plant and office premises of the organization		
Performance Criteria (PC) w.			
Element	Performance Criteria		
Ensure sorting	PC1. Follow the sorting process and check that thetools, fixtures & jigs		
	that are lying on workstations are the ones in use and un- necessary itemsare not cluttering the workbenches or work		
	surfaces.		
	PC2. Ensure segregation of waste in hazardous/ non Hazardous waste as		
	per the sorting work instructions		
	PC3. Follow the technique of waste disposal and waste storage in the		
	proper bins as per SOP		
	C4. Segregate the items which are labelled as red tag items for the		
	process area and keep them in the correct places		
	PC5. Sort the tools/ equipment/ fasteners/ spare parts as per		
	specifications/ utility into proper trays, cabinets, lockers as mentioned in the 5S guidelines/ work instructions		
	C6. Ensure that areas of material storage areas are not overflowing		
	PC7. Properly stack the various types of boxes and containers as per the		
	size/ utility to avoid any fall of items/ breakage and also enable		
	easy sorting when required		
	PC8. Return the extra material and tools to the designated sections and		
	make sure that no additional material/ tool is lying near the work		
	area		
	PC9. Follow the floor markings/ area markings used for demarcating		
	the various sections in the plant as per the prescribed instructions and standards		
Ensure proper	PC10. Follow the proper labeling mechanism of instruments/ boxes/		
documentation and storage	containers and maintaining reference files/ documents with the		
( organizing , streamlining)	codes and the lists		
	PC11. Check that the items in the respective areas have been identified as		
	broken or damaged		
	PC12. Follow the given instructions and check for labelling of fluids, oils.		
	lubricants, solvents, chemicals etc. and proper storage of the same		
	to avoid spillage, leakage, fire etc.		
	PC13. Make sure that all material and tools are stored in the designated		

places and in the manner indicated in the 5S instructions
PC14. Check whether safety glasses are clean and in good condition
PC15. Keep all outside surfaces of recycling containers are clean
PC16. Ensure that the area has floors swept, machinery clean and
generally clean. In case of cleaning, ensure that proper displays are
maintained on the floor which indicate potential safety hazards
PC17. Check whether all hoses, cabling & wires are clean, in good
condition and clamped to avoid any mishap or mix up
PC18. Ensure workbenches and work surfaces are clean and in good
condition
PC19. Follow the cleaning schedule for the lighting system to ensure
proper illumination
PC20. Store the cleaning material and equipment in the correct location
and in good condition
PC21. Ensure self-cleanliness - clean uniform, clean shoes, clean gloves,
clean helmets, personal hygiene
PC1. Follow the daily cleaning standards and schedules to create a
clean working environment
PC2. Attend all training programs for employees on 5 S
PC3. Support the team during the audit of 5 S
PC4. Participate actively in employee work groups on 5S and encourage
team members for active participation
PC5. Follow the guidelines for What to do and What not to do to build
sustainability in 5S as mentioned in the 5S check lists/ work
instructions
ng (K) w.r.t. the scope
Knowledge and Understanding
The user/individual on the job needs to know and understand:
KA1. relevant standards, procedures and policies related to 5S
followed in the company
The user/individual on the job needs to :
KB5. have basic knowledge of 5S procedures
KB6. know various types 5s practices followed in various areas
KB7. understand the 5S checklists provided in the department/ team
KB8. have skills to identify useful & non useful items
KB9. have knowledge of labels , signs &coloursused as indicators
KB10. Have knowledge on how to sort and store various types of tools,
equipment, material etc.
KB11. know , how to identify various types of waste products
KB12. understand the impact of waste/ dirt/ dust/unwanted
substances on the process/ environment/ machinery/ human

Skills (S)w.r.t. the scope	body KB13. have knowledge of best ways of cleaning & waste disposal KB14. understand the importance of standardization in processes KB15. understand the importance of sustainability in 5S KB16. have knowledge of TQM process KB17. have knowledge of various materials and storage norms KB18. understand visual controls, symbols, graphs etc.			
Element	Skills			
A. Core Skills/ Generic	Writing Skills			
Skills	The user/ individual on the job needs to know and understand how to: SA7. write basic level notes and observations SA8. note down observations (if any) related to the process SA9. write information documents to internal departments/ internal teams			
	Reading Skills			
	The user/individual on the job needs to know and understand how to: SA10. read 5S instructions put up across the plant premises			
	Oral Communication (Listening and Speaking skills)			
	The user/individual on the job needs to know and understand how to:  SA11. effectively communicate information to team members inform employees in the plant and concerned functions about 5S  SA12. question the process head in order to understand the 5S related issues  SA13. attentively listen with full attention and comprehend the information given by the speaker during 5S training programs			
B. Professional Skills	Judgmental Thinking			
	The user/individual on the job needs to know and understand how to:  SB3. use common sense and make judgments during day to day basis SB4. use reasoning skills to identify and resolve basic problems using 5S			
	Persuasion			
	The user/ individual on the jobs needs to know and understand how to:  SB5. persuade co team members to follow 5 S  SB6. ensure that the co team members understand the importance of using 5 S tool			
	Creativity			

	The user/individual on the job needs to know and understand how to:  SB7. use innovative skills to perform and manage 5 S activities at the work desk and the shop floor  SB8. exhibit inquisitive behaviour to seek feedback and question on the existing set patterns of work	
	Self –Discipline	
The user/individual on the job needs to know and understa		
	SB9. do what is right, not what is a popular practices	
	SB10. follow shop floor rules& regulations and avoid deviations; make	
	5S an integral way of life	
	SB11. ensure self-cleanliness on a daily basis	
	SB12. demonstrate the will to keep the work area in a clean and orderly	
	manner
