TITLE-MEDICAL IMAGING TECHNIQUES

TEST QUESTIONS (30*1=30 Marks)

Name of the student: DHANUSH .S

Timing: 30 Mintues

Answer all the Questions

1. In a normal X-Ray machine, X – Rays are produced by _____
 a) bombardment of cathode rays on a radioactive material
 b) nuclear fission
 c) nuclear fusion
 d) super heating of an element
2. How much of the generated energy actually utilized for taking an X-Ray?
 a) 0.1%
 b) 1%
 c) 10%
 d) 100%
3. Dental X-Ray is also known as _____
 a) Orthopedics
 b) Orthopentology
 c) Orthology
 d) Orthopantomography
4. Which of the following machines is often placed together with an X-Ray machine?
 a) Endoscopy
 b) Ultrasound
 c) Fluoroscopy
 d) C – Arm
5. Up to what intensity of radiation is used for mammography?
 a) < 10keV
 b) < 20keV
 c) < 30keV
 d) < 40keV

6. . What should be the minimum distance maintained when an X-Ray is being taken?
a) 10 m
b) 15 m
c) 35 m
d) 50 m
7. Which of the following needs the longest exposure for an X-Ray image?
a) Thoracic
b) Abdomen
c) Spine
d) Pelvis
8. The X-Ray is recorded on a plate coated with _____
a) Gold Halide
b) Silver Halide
c) Copper Halide
d) Iron Halide
9. What does the 'P' in PET stand for?
a) Positron
b) Photon
c) Proton
d) P - orbital
10. What does the 'P' in SPECT stand for?
a) Positron
b) Photon
c) Proton
d) P - orbital
11. What makes PET and SPECT so unique when it comes to nuclear imaging?
a) Do not require dyes
b) Do not require X - Rays
c) They show the metabolic functions
d) They give more details about the imaged organ/tissue
12. SPECT includes a _____ for imaging.
a) Gamma Camera
b) Silver Halide Film
c) Phosphorus Sheet
d) Lead Sheet
13. What property of sound waves acts like the principle of ultrasound?
a) Reflection and Refraction
b) Reflection only
c) Refraction only
d) Propagation
14. Which of the following medical imaging modality other than ultrasound is not a form of radiation?

- a) PET Scan
 - b) SPECT Scan
 - c) CT Scan
 - d) MRI
15. A piezoelectric crystal is used to produce the ultrasound waves. What kind of ultrasound is produced?
- a) Pressure wave ultrasound
 - b) Electrical wave ultrasound
 - c) Sound wave ultrasound
 - d) Simple ultrasound
16. The wave velocity of ultrasound in soft tissues is 1540m/s and the impedance offered by it is $1.63 \times 10^6 \text{ kg/m}^2\text{s}$. What is the density of the soft tissue?
- a) 0.1058441 kg/m^3
 - b) 10.58441 kg/m^3
 - c) 1058.441 kg/m^3
 - d) 105844.1 kg/m^3
17. When an abdominal ultrasound is done, why is it advised to have a full bladder?
- a) To have a good acoustic window
 - b) To increase the water content
 - c) To lower impedance
 - d) To allow for better propagation of waves
18. What does the red dot on the probe help within the produced image?
- a) To check if the correct probe was used
 - b) To check the probe orientation
 - c) To check the depth of the probe that was used
 - d) To check the plane of the image.
19. What is termed as the amount of sound energy that is reflected off a surface?
- a) Reflection
 - b) Refraction
 - c) Diffraction
 - d) Frequency
20. How much times greater is the threshold of pain corresponding to pressure amplitude of the atmospheric pressure?
- a) 10 million
 - b) 1 billion
 - c) 1 trillion
 - d) 1 million
21. What is the term for audible sound when sound pressure is $20 \times 10^{-6} \text{ Pa}$?
- a) Threshold of hearing
 - b) Threshold of pain
 - c) Threshold of intensity
 - d) Threshold of sound

- a) Bone salts
 - b) Bony Prominence
 - c) Inflamed Joints
 - d) Bone Marrow
23. If the XY grid is selected in MRI then the slice selection is in which plane?
- a) X plane
 - b) Y plane
 - c) Z plane
 - d) XY plane
24. In a brain scan of a person suffering/suspected of suffering from schizophrenia, the brain
- a) has gray matter which more than normal
 - b) has white matter which more than normal
 - c) is of a size bigger than normal
 - d) has shrunk
25. Frontotemporal Dementia brain scan shows a _____
- a) growing brain
 - b) shrinking brain
 - c) brain with lesions
 - d) brain with a tumour
26. Where are the platelets produced?
- a) In Liver
 - b) In Spleen
 - c) In Gall Bladder
 - d) In Megakaryocytes
27. Where are Kupffer cells found?
- a) Brain
 - b) Lungs
 - c) Liver
 - d) Spleen
28. How are mature and non - matured RBCs distinguished?
- a) Mature RBCs are biconcave while non - mature RBCs are round
 - b) Mature RBCs have mitochondria while non - mature RBCs do not have mitochondria
 - c) Mature RBCs have nucleus while non - mature RBCs do not have nucleus
 - d) Mature RBCs have haemoglobin while non - mature RBCs do not have haemoglobin
29. In fracture, especially in long bones, the body starts giving weight _____
- a) medially
 - b) axially
 - c) centrally
 - d) normally

On behalf of Jaya Sakthi Engineering College we would like to extend our heartfelt thanks and gratitude to you for addressing our students on Medical Imaging Techniques from 13.09.2021 to 17.09.2021. The students gained valuable insights and knowledge on the topic. The information you shared were very enlightening for our students.

Thank you very much once again for associating with us. We look forward for a long and fruitful association with you.

Warm regards

ABOUT THE COLLEGE

Jaya Sakthi Engineering College a premier technical institution approved by AICTE and affiliated to Anna University was established in 1995 with a focus on technological innovation, entrepreneurship and character building in the students. The institution has been established by Jaya Educational Trust, imparting 12 excellent educations through 21 educational institutions offering courses in medicine, paramedical and arts & science besides running many schools, catering the needs of the society. The college management team consists of well experienced and committed Academicians and Administrators.

ABOUT THE DEPARTMENT

Biomedical Engineering is the application of the principles and problem-solving techniques of engineering. Biomedical engineering is the application of the principles and problem-solving techniques of engineering to biology and medicine. This is evident throughout healthcare, from diagnosis and analysis to treatment and recovery, and has entered the public conscience through the proliferation of implantable medical devices, such as pacemakers and artificial hips, to more futuristic technologies such as stem cell engineering and the 3-D printing of biological organs. The Mission of the department is to educate students to understand the human body as an integrated system through quantitative engineering analysis and to use that understanding to design better therapeutic strategies, devices, and diagnostics.

ABOUT THE COURSE

Medical imaging is the technique and process of imaging the interior of a body for clinical analysis and medical intervention, as well as visual representation of the function of some organs or tissues (physiology).

Medical imaging seeks to reveal internal structures hidden by the skin and bones, as well as to diagnose and treat disease. Medical imaging also establishes a database of normal anatomy and physiology to make it possible to identify abnormalities. Although imaging of removed organs and tissues can be performed for medical reasons, such procedures are usually considered part of pathology instead of medical imaging.

ABOUT THE DEPARTMENT

The Computer Science Engineering department of this college understands the needs of the society and striver to produce excellent quality engineers and professionals in its mission to contribute to the industry to the future.

The foremost objective of the Computer Science and Engineering programme is to hone technical skills demanded by today's engineering professionals by providing a sound technical platform and the required knowledge base. It prepares them to meet the challenges faced by today's IT professional by exposing them to a wide array of cutting-edge technologies. The Department of Computer Science at JSEC is renowned for cutting edge research and for imparting state of the art education. We attract some of the brightest students and faculty, and invite you to join us in the excitement.

ABOUT THE WORKSHOP

Green Technologies is a highly interdisciplinary degree program that emphasizes green systems and the environment, energy technology and efficiency, and sustainability and society. The objective of this course is to:

Seek opportunities for alternative sourcing, conservation, efficiency and repurposing through an understanding of product life cycles from origins to recycling or inevitable disposal.

To combine technical and scientific skills with an understanding of the environment, renewable energy management, waste utilization, resource management and land based industries who can contribute to the national and global development.

Hence this one day workshop is aimed at discussing the important topics of the Green Technology touching upon relevant applications in engineering field.

ABOUT THE COLLEGE

Jaya Sakthi Engineering College a premier technical institution approved by AICTE and affiliated to Anna University was established in 2006 with a focus on technological innovation, entrepreneurship and character building in the students. The institution has been established by Jaya Educational Trust, imparting 12 excellent educations through 21 educational institutions offering courses in medicine, paramedical and arts & science besides running many schools, catering the needs of the society. The college management team consists of well experienced and committed Academicians and Administrators.

ABOUT THE DEPARTMENT

The discipline of Mechanical Engineering which is the prime hub of engineering education was started right from the inception of the Jaya Sakthi Engineering College in 2006. The department offers the richly integrated Anna University curriculum to its BE students with the help of highly qualified and intellectually stimulating teams of lecturers. The department possesses intake of around sixty students every year.

ABOUT THE COURSE

Finite element analysis is an important subject for Mechanical Engineering graduates, especially for those who dream of working in the R & D of leading manufacturing, automotive and aerospace industries. It is also given academically trending research area where enormous amount of cutting edge research is being conducted.

Though many workshops focus on the application of finite element simulation using available software codes, very rarely theory behind the application is disseminated. We have also come across difficulties

amongst the student community in understanding this subject, which is part of the V semester Mechanical Engineering curriculum under Anna University

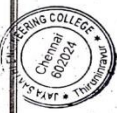

Hence this one day workshop is aimed at discussing the important topics of the current Finite Element Analysis syllabus and also touching upon relevant applications in solid mechanics and thermal engineering.

REPORT ON VALUE ADDED COURSE

Title of the Course: "Medical Imaging Techniques"

Venue: Biomedical Instrumentation Lab

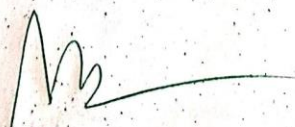

Course duration: 13.09.2021 to 17.09.2021

Contact Hours: 6 hr daily, for a total of 30 hrs.

The Course was conducted at our college campus for the students of Biomedical Engineering Students and it was conducted for five days. The Resource person named Mr.R.Kamalakannan who is a senior grade Biomedical Engineer at RMR hospital, organized the session in worthy manner such that the whole content was covered. At the end of the session the students were able to gain knowledge about basic medical imaging equipments like MRI, CT, Ultrasound and its applications in the medical field along with its usage. As a Biomedical Student it was very much helpful apart from the curriculum.

A REPORT ON VALUE ADDED COURSE : "Skill Enhancement Course in

Green Technology"

Organized by

Department of Computer Science and Engineering

A value added course on Green Technology held from 20th August 2018 To 28th September 2018. Department of Computer Science and Engineering conducted the course by the support of our Institution. It was Co-ordinated by Mr. S. Selvakumaran. Resource person was invited from Crampete Learning Pvt. Ltd, Mrs. S.A. ArumaiShiny. At Day 1, The Event starts at 4 p.m and ends up at 6 p.m. Likewise, the course completed for remaining 30 days. The Resource person taught and delivered the course to all the students very well. The students learnt about the course and it is a value added course to enhance their skills for the future endeavours. At the End of the Session. We collected the feedback forms and overall feedback was very good about the course deliverance.

Course Duration : From 20-08-2018 To 28-09-2018
