## Event Outcomes

- Clarify their values, interests, strengths and skills
- Articulate their transferable, liberal arts, graduate school and work-related skills
- Identify and research a wide variety of career fields and opportunities
- Cultivate a professional network and engage in informational interviews
- Gain experience and insights through site visits, job shadowing and internships
- Evaluate the environmental fit of a variety of work settings and roles
- Market themselves effectively to prospective employers (through written documents, online presence, and skillful interviews)
- Identify and use relevant tools in the job search, including activating professional networks

## Event Outcomes:

- An engineer is expected to multitask in his organization. While he plays the leader to his teammates, he may simultaneously be expected to handle client queries. An ordinary engineer who lacks the ability to handle many tasks at a time may fail to cope with these industry expectations.
- In this programme the students learnt about the industry expectation from workers is that they should be professional, productive, respectful, and responsive to customer needs.
- Engineers play an important role in pushing the boundaries of applied science, solving technical problems that enable construction, manufacturing, medicine, and numerous other areas to reach new heights.
